Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 17-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 17 “said connector means” and “said opposed displaceable surface portions” have no antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by McConnell.

With respect to claim 16 note the tool 50 equivalent of flexible spring steel equivalent to an insert as claimed inherently capable of being inserted disposed between interengaging members.

With respect to claim 17 note the notch 51 equivalent to passage means as claimed. With respect to claims 18 and 19 note the arm portion 52 equivalent to finger grasping means or an extension tab as claimed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3765

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over McConnell in view of Nelson. McConnell does not teach a through hole on the outer extension of the tool/insert 50. Nelson teaches old the use of a through hole 17 on the extension of a tool to facilitate gripping the tool. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the tool/insert 50 of McConnell with the through hole 17 of Nelson to achieve the advantage of an alternative means of gripping the tool/insert.

7. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over McConnell in view of Nelson as applied to claim 20 above, and further in view of Dissing. McConnell does not teach forming the insert member of plastic. Dissing teaches old the use of plastic in forming a tool/insert member 12 (see column 1, line 42). It would have been obvious to one of ordinary skill in the art at the time of the invention to substitute the flexible plastic for the flexible metal of McConnell to achieve a like result of forming a stiff yet flexible tool/insert.

Allowable Subject Matter

8. Claims 1-15 are allowed.

Conclusion

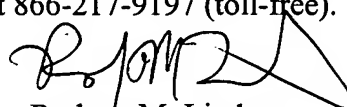

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note particularly, the connector means of British patent to Rigby et al. and the passage means of the tool of Berney et al.
